9. 男女には得意不得意があり、理数系方面で女子は採用しない口実となっている。
10. 優れた理数系の能力を持ちながら、そうした方面に進んでいない女子高校生。

問題 [Ⅲ]

According to the graph, more than 15 percent of boys find pro athletes attractive for their future profession, followed by firefighters, engineers, astronauts. On the other hand, doctors are the most attractive among girls, teachers the second attractive. Less than 5 percent of girls want to be scientists or chefs/bakers. As for myself, I wanted to become a teacher of Japanese language, and now I still do. When I was a fifth grade elementary school student, I watched a TV documentary that featured a female Japanese language teacher working overseas. She taught in several countries and interacted passionately with local people. What impressed me most was her pride in the Japanese language and culture. Since then I have been very interested in teaching them outside of Japan.
